

# PRICING GUIDE

---

## HOW MUCH DOES THIS REALLY COST?

Many details go into planning a wedding. But, it's hard to find the details and prices for floral pieces. That means most brides have no idea how much they should expect to budget for their flowers. I want to try to help with that by providing a pricing guide, giving some real prices for real flowers! Remember that time, season, quantity needed, containers and labor all play a key in estimating the cost of a finished floral item. In this section of my website, I have tried to give a range of examples, showing how the quantity of flowers needed, their price and labor charge. Whether we talk on the phone, via email or meet face-to-face, my prices are consistent.

## FLOWER OVERVIEW PRICES

Some of the most popular flowers for weddings are peonies, hydrangeas, garden roses, dahlias and ranunculus. See below for some average prices and information about when these flowers are available. Remember, these are just average costs as weather and time of year can affect pricing. *\*Prices are year round unless otherwise noted.*

---
